DETAILED ACTION

Allowable Subject Matter

- 1. Claims 6-12, 15, 17, 18, 26, 27 and 30-35 allowed.
- 2. Claims 20 and 23-25 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 19 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Raajmakers et al. (2002/0052124) in view of Halliyal et al. (6,319,775) further in view of Buchanan et al. (6,511,876) further in view of Foglietti et al. (2002/0142500)

Regarding Claims 19 and 21, Raajmakers et al. disclosed in SITU dielectric stacks where in paragraph 21 and claims 1, 10, 25 and 29, it is disclosed deposition of oxide layer on semiconductor substrate and and deposition of nitride layer on oxide layer with different temperatures. Raajmakers et al. fail to disclose the required transferring of substrate to a different chamber between the deposition of oxide and nitride layers, the required temperature structure and the required ozone rinsing for oxide growing. However, Halliyal et al. disclose nitridation process for fabricating an ONO floating-gate electrode in a two-bit EEPROM device where clams 5 and 9 the required transferring

method is disclosed. Furthermore, Buchanan et al. disclose high mobility FETs using A1203 as a gate oxide where in claim 26, the required temperature structure is disclosed. Finally, Foglietti et al. disclose an ultra-thin interface oxidation by ozonated water rising for emitter poly structure where in claims 1, 5 and 16, the required ozone rising for oxide growth is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required transfer method, the temperature structure and the required ozone rinsing for oxide growth in Raajmakers et al. as taught by Halliyal et al., Buchanan et al. and Foglietti et al. respectively, in order manufacture a semiconductor device with increased reliability.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Application/Control Number: 10/074,884

Art Unit: 2826

however, will the statutory period for reply expire later than SIX MONTHS from the date of this way patent End of this way patent End of this way the date of this way patent End of this way the date of this way the date of the date

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The examiner can normally be reached on M - F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
